Experience

JANUARY 2021 - JUNE 2021

Prime Digital Academy, Minneapolis, MN
Full Stack Engineering Student
- Enrolled in a 20 week immersive program which provided the training required to gain skills in relevant computer languages such as React.js, Node.js, PostgreSQL.
- **Solo Project:** Created a full CRUD web application with RESTful API targeting Tasty API. Allows users to find and try new recipes, which can easily be saved and added to favorites for future use. Built in 2 weeks using: React, Redux, Node, Express, and PostgreSQL.
- **Group Project: YourPath**- YourPath is an organization seeking to improve healthcare for substance abuse for marginalized populations. It was a 3 week project working with a team for a client.
    - The client needed a way to visualize analytics from an extensive assessment form filled out by users. We targeted the Jotform api to extract the data they are collecting and built the client a dashboard with a plethora of charts and data. The project helped the client sort through and visualize all of the information.
    - Built using React, Redux, Node, Express, PostgreSQL and Jotform API.
